

æthereo[®] Everywhere ESSENTIAL OILS

Fan Diffuser for Essential Oils

Enjoy Aromatic and Therapeutic
Benefits Wherever You Are

Work • Home • Travel

Plant Extracts International introduces Aethereo[®] EVERYWHERE, the latest in portable, personal diffusion. Its advanced engineering and design offer important features previously lacking in portable fan diffusers. Aethereo[®] EVERYWHERE takes its place as a reliable, versatile, serious tool for diffusing essential oils in smaller scale and “on the go” environments.

Aethereo[®] EVERYWHERE is light and compact. Weighing less than 4 ounces, it's just 3.5" in diameter, and 2.5" in height. Take it with you in its original box in a tote or small carry-on.

It runs for 8-12 hours on two AA batteries, or can be powered anywhere with USB options. Use the micro-USB cable for your cell phone, tablet, or laptop. Be sure to take the batteries out when you are not using them. The diffuser circuitry is designed to protect the batteries when the USB cable is plugged in. Running on USB power will not charge the batteries.

Its one-piece design means no parts to misplace or lose. Both covers (the top for the essential oil well, and the bottom for the battery compartment) slide sideways to open and close. The green power light can be turned off while diffusing in darkness.

Diffusion Options

Aethereo[®] Aromatherapy Inhalers are the most efficient way to enjoy essential oils. Since they are capped until they are used, and the essential oil is inhaled from within a few inches, very little aroma is lost to the atmosphere. The essential oil in the Aethereo inhaler can be enjoyed for several months.

H2EO[®] AirCare Ultrasonic Diffusers are by far the most efficient way to diffuse essential oils into a medium to large room. Effective in an area up to 1500 to 2200 cubic feet. Using the water in the bowl of the diffuser as the “carrier” for the essential oil, each nano-droplet of water is covered with a molecule-thin coating of essential oil, which rapidly becomes part of the room's atmosphere.

Aethereo's EVERYWHERE Fan Diffuser utilizes a small fan to diffuse the essential oil into the environment in which it is being used. It is ideal for small spaces – cars, hotel rooms, small bedrooms, practitioners' rooms, or travel to in-home treatment sessions – and will be most effective within an eight to ten foot radius.

The type of essential oil pad used will have a significant effect on the release of aroma. The conventional high-density compressed-paper pad is not particularly efficient, and will only release part of the essential oil that has been applied. However, they are inexpensive, and if the same essential oil is used, can be reused for a limited time. Aethereo's exclusive open-cell porous polyethylene AromaDisc will release virtually all of the essential oil within several hours. Not only are these much more efficient, they can be washed, dried, and reused many times. The material in the AromaDisc is impervious to essential oils, and contains no plasticizers. The AromaDisc rests on a removable (for cleaning) stainless steel buffer ring, which helps prevent essential oil carry-over when changing from one essential oil to another.

Easy Directions for Use

- 1) Choose between battery or USB power options.
If using batteries, open the battery cover on the bottom of diffuser by gently sliding it to either side. Install two AA batteries (not included).
- 2) Add 5-10 drops of pure essential oil, or a combination of pure essential oils to create your own blend, on a reusable AromaDisc or disposable paper pad.
- 3) To open the cover on top of the diffuser, gently slide it to either side.
- 4) Place the AromaDisc on the stainless steel buffer ring in the well of the diffuser.
- 5) Slide cover back to center.
- 6) Press the power button to begin diffusing.
- 7) To turn off the green power light when diffusing at night, press and hold the power button for three seconds.
- 8) Your Aethereo EVERYWHERE Diffuser will run continuously until turned off, or until batteries run out of charge. When that happens, remove them (never leave batteries in the diffuser when not diffusing). The diffuser circuitry is designed to protect the batteries when the USB cable is plugged in. Running on USB power will not charge the batteries.
- 9) To turn your diffuser off, briefly press the power button. Remove batteries to preserve battery life.

Battery operation requires two AA batteries.

Batteries not included.

New AA batteries will run the diffuser for 8-12 hours of continuous diffusion, depending on type of battery.

Aethereo® Accessories and Aethereo® Essential Oils available at www.plantextractsinc.com

Micro USB Cable

110 VAC/5VDC Wall Adapter

12 VDC/5VDC Car Adapter

Aethereo AromaDiscs

AromaDiscs may be used several times depending upon compatibility and quality of the essential oils.

Compressed Paper Aroma Pads

Stainless Steel Buffer Ring
